Mr. Ruben Robbins 4372 Highway 12 Santa Rosa, California 95409

RE: Former Exxon RAS #7-3035/4501 Sonoma Highway, Santa Rosa, California.

Dear Mr. Robbins:

Attached for your review and comment is a document entitled *Laboratory Analysis Results of Groundwater Sample Collected from Private Water Well*, dated May 17, 2006, for the above-referenced site. The document was prepared by Environmental Resolutions, Inc. (ERI) of Petaluma, California, and provides the analytical laboratory results for the first quarter 2006 groundwater sample collected from the private water well located at 4372 Sonoma Highway, in Santa Rosa, California.

These data were generated by ERI on behalf of ExxonMobil to comply with requirements of the Regional Board in accordance with state regulations. ExxonMobil makes no representations as to these data for any other purpose.

Thank you for your continued cooperation in providing access to sample your well.

Water sample analytical results including analytical data sheets are provided quarterly to the office of the Regional Board. If you have any questions, please contact Ms. Jo Bentz of the Regional Board at 707.576.2838.

Sincerely

Jennifer C. Sedlachek Project Manager

SUBJECT

Laboratory Analysis Results of Groundwater Sample Collected from Private Water Wells Located at 4372 Highway 12, Santa Rosa, California

Ms. Sedlachek:

At the request of Exxon Mobil Corporation (Exxon Mobil), Environmental Resolutions, Inc. (ERI) is providing the analytical laboratory results of the groundwater samples collected from the private water wells located at 4372 Highway 12, in Santa Rosa, California, on March 30, 2006. The samples were collected by ERI and analyzed by a California state-certified laboratory, under Chain-of-Custody protocol, for total petroleum hydrocarbons as gasoline, total petroleum hydrocarbons as diesel, and methanol using Environmental Protection Agency (EPA) Method 8015B, and benzene, toluene, ethylbenzene, and total xylenes, oxygenated compounds (including methyl tertiary butyl ether, ethyl tertiary butyl ether, tertiary amyl methyl ether, tertiary butyl alcohol, di-isopropyl ether, and ethanol), and lead scavengers (including 1,2-dibromoethane and 1,2-dichloroethane) using EPA Method 524.2. The laboratory analysis report for the private water well sample is attached. The laboratory results are summarized in Tables 1A and 1B.

Please contact Ms. Paula Sime, ERI's project manager for this site, at (707) 766-2000 with any questions.

Sincerely,

Environmental Resolutions, Inc.

Paula Śime Project Manager
